

SUMEET PATIL

Engineering student with expertise in application development and computer science fundamentals. Skilled in designing, building, and configuring applications to meet business needs. Proficient in Java, Python, SQL, Flask, Django, and Docker. Experienced in data analysis, machine learning, and technical documentation. Strong problem-solving abilities and a collaborative approach to project execution.

Work Experience

Coding Intern

Information Sharing and Analysis Centre (November 2023 - December 2023)

- Developed a Backend API for Weather Forecast using Python and Flask framework.
- Tested the API using Postman.

Project Intern

Verzeo (May 2022 - June 2022)

- Participated in the creation and maintenance of project tracking tools, ensuring clear communication of expectations and responsibilities.
- Conducted sentiment analysis using machine learning with Python, training a model to predict positive or negative reviews.

PROJECTS

- Backend API for Weather Forecast
Developed using Python and Flask.
- Sentiment Analysis on Restaurant Data
Performed using machine learning with Python.
- Blood-Bank-Management-System
Developed as part of DBMS project.

Skills

Technical Skills

- Docker
- Technical Documentation
- Data Analysis
- Machine Learning

Tools/Software

- Flask
- Postman
- Git
- Linux

Languages

- Java
- Python
- R
- C
- C#
- SQL
- JavaScript
- PHP
- Django
- NodeJS

CERTIFICATIONS

- Machine Learning with Python - Verzeo
- Python 101 for Data Science - IBM
- Networking Basics - CISCO
- Google Cybersecurity - Coursera

ACHIEVEMENTS

- First Place in 'Idea Presentation'.
- 5-star gold badge in problem-solving on Hacker Rank for SQL Challenges.
- Google Cybersecurity Badge from Coursera.
