

SUMEET PATIL

FORWARD DEPLOYED ENGINEER

Bengaluru 7022527240 [Portfolio](#) [LeetCode](#) sumeetpatil8384@gmail.com [LinkedIn](#)

SUMMARY

A Software Engineer with 1+ years of experience in working with data pipelines, monitoring, SQL debugging, root cause analysis, and handling production incidents, along with practical knowledge of full stack and artificial intelligence/machine learning development. Has experience analyzing vague workflow problems, communicating technical problems between teams, and creating end-to-end applications using languages like Python, Java, Spring Boot, Django, React, Node.js, RESTful APIs, WebSockets, and SQL. Looking for Forward Deployed Engineering positions.

TECHNICAL SKILLS

- Software Engineering: Python, Java, SQL, TypeScript, Spring Boot, Django, Node.js, Express, React, REST APIs, WebSockets, Git, GitHub, Data Structures & Algorithms, Object-Oriented Programming, DBMS
- AI Engineering: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Model Evaluation, Model Deployment, TensorFlow, scikit-learn, Pandas, NumPy
- Infrastructure & Operations: Docker, Grafana, Monitoring, Observability, Logging, Incident Response, Root Cause Analysis, Linux, Postman
- Data & Integration: Data Ingestion, Data Validation, Data Processing, ETL/ELT, MySQL, PostgreSQL, MongoDB, SQLite, API Integration, SQL Debugging
- Solution Engineering: Requirements Comprehension, Technical Problem Solving, Troubleshooting, Technical Communication, Stakeholder Management, Cross-Functional Collaboration, Technical Documentation

PROFESSIONAL EXPERIENCE

Associate Data Operations Engineer - Consilio LLC | Bengaluru

JUL 2025 - SEPT 2026

- Governing and pre-processing data through Relativity by validating, deduplication, OCR processing, indexing, and preparation of client data for future ingestion.
- Streamed data feed monitoring through Grafana dashboard, detection of telemetry problems and pipeline latency, and investigations of problems affecting the workflow execution.
- Managed 2,900+ L2/L3 production incidents through use of advanced SQL queries and workflow investigation for the identification of data problems and root cause analysis.
- Investigated repeated problems in workflow execution, failure tracing within the data processing stage, documentation of findings, and coordination with appropriate teams for incident resolution.

PROJECTS

- **SecurelyGo - Java, Spring Boot, PostgreSQL, React | On-going**

Building a backend-oriented booking and dispatching system prototype that includes Spring Boot RESTful API endpoints, PostgreSQL database, JWT authentication and WebSocket-based status messages.

- **Quick-Commerce - Django, Python**

Developed backend of an e-commerce application with relational models for customers, products, orders and order items authentication and order tracking from start to end has been provided.

- **Restaurant Review Sentiment Analysis - Python, scikit-learn, Pandas, NumPy**

Implemented sentiment classification pipeline including CountVectorizer, SVM and Naive Bayes model and compared models with respect to performance and chose the best approach among them.

- **Detection of Cervical Cancer - Python, CNN, Flask**

Created a CNN classification project using image data of cervical cells and incorporated the trained model into the Flask framework for uploading and classifying the image data

EDUCATIONAL ACCOMPLISHMENTS AND CREDENTIALS

B.E. Computer Science and Engineering - Dayananda Sagar, Bangalore CGPA: 8.60/10.0

2021 - 2025

- 1st Place - Final Year Project: "Detection of Cervical Cancer using Deep Learning" (Image Classification using CNNs).
- 1st Place - "Innovative Solutions in Technology" competitive idea presentation.
- HackerRank - 5 star in SQL | LeetCode - solved 236+ problems.
- Certifications - Google AI Essentials | IBM Python 101 for Data Science | Machine Learning with Python.
- Publications - "Detection of Cervical Cancer using Deep Learning" - IRJMETS, Vol. 07, 2025 | DOI: 10.56726/IRJMETS66217
