

SUMEET PATIL

SOFTWARE ENGINEER | DATA ENGINEER

Bengaluru 7022527240 [Portfolio](#) [LeetCode](#) sumeetpatil8384@gmail.com [LinkedIn](#)

SUMMARY

Computer Science professional with 1+ year of experience specializing in data ingestion, governance, processing, monitoring, SQL-based trouble shooting, root cause analysis, and incident management. Also has practical knowledge of backend and full stack development via internships and projects. Developed applications using Java, Spring Boot, Python, Django, React, Node.js, REST APIs, WebSockets, and SQL. Looking for software | backend | data engineering roles.

TECHNICAL SKILLS

- Languages: Java, Python, SQL, Javascript
- Full Stack Development & APIs: Spring Boot, Django, Nodejs, Express, React, REST APIs, WebSockets
- Data & Database: Data Ingestion, Validation, Processing, MySQL, MongoDB, SQLite, Pandas, Numpy
- Monitoring & Tools: Grafana, Git, GitHub, Postman, Docker, Relativity
- Computer Science Fundamentals: Data Structures & Algorithms, Object Oriented Programming, DBMS, OS

PROFESSIONAL EXPERIENCE

Associate Data Operations Engineer - Consilio LLC | Bengaluru

JUL 2025 - SEPT 2026

- Enforced data governance and pre-processing controls in Relativity to validate, dedup, OCR, index, and export client datasets for downstream ingestion.
- Managed Real-Time Observability: Leveraged Grafana dashboards to monitor streaming data feeds, detect telemetry anomalies, and troubleshoot pipeline latency.
- SQL Root-Cause Analysis: Handled 2,900+ L2/L3 production incidents, writing complex SQL queries and analyzing workflow logic to remediate data defects under tight SLAs.

Full Stack Developer Internship - WebStack Academy | Bengaluru

JUL 2024 - SEPT 2024

- Created a food delivery application with the use of MongoDB, Express, React, and Node.js in collaboration with a team of three members. Implemented and integrated REST APIs with React components and MongoDB data models and collaborated on Stripe, Cloudinary, and Mailtrap technologies in building the application.
- Resolved issues in integrating front end and back end and participated in the development of the application.

PROJECTS

• SecurelyGo - Java, Spring Boot, PostgreSQL, React | On-going

Building a backend-oriented booking and dispatching system prototype that includes Spring Boot RESTful API endpoints, PostgreSQL database, JWT authentication and WebSocket-based status messages.

• Quick-Commerce - Django, Python

github.com/sumeetpatil01/Quick-Commerce

Developed backend of an e-commerce application with relational models for customers, products, orders and order items authentication and order tracking from start to end has been provided.

• Restaurant Review Sentiment Analysis - Python, scikit-learn, Pandas, NumPy

github.com/sumeetpatil01/Sentimentanalysis

Implemented sentiment classification pipeline including CountVectorizer, SVM and Naive Bayes model and compared models with respect to performance and chose the best approach among them.

EDUCATION

B.E. Computer Science and Engineering – Dayananda Sagar, Bangalore

2021 - 2025

CGPA: 8.60/10.0

ACHIEVEMENTS & CERTIFICATIONS

- 1st Place - Final Year Project: "Detection of Cervical Cancer using Deep Learning" (Image Classification using CNNs).
- 1st Place - "Innovative Solutions in Technology" competitive idea presentation.
- HackerRank - 5 star in SQL | LeetCode - solved 236+ problems.
- Certifications - Google AI Essentials | IBM Python 101 for Data Science | Machine Learning with Python.
- Publications - "Detection of Cervical Cancer using Deep Learning" - IRJMETS, Vol. 07, 2025 | DOI: 10.56726/IRJMETS66217
