

SUMEET PATIL

Software Engineer

Bengaluru, Karnataka | +91 7022527240 | sumeetp967@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

SUMMARY

Software Engineer with production experience building and operating large-scale data-processing systems, plus full-stack development experience across Java/Spring Boot, MERN, and Django/Flask from internships and self-driven projects. Strong foundation in data structures, algorithms, and relational/NoSQL databases, with a track record of using SQL to resolve production data-integrity issues at scale. Seeking a Software Engineer I role to design and scale backend systems.

SKILLS

Languages: Java, Python, SQL, JavaScript

Databases: MySQL, MongoDB, PostgreSQL

Tools & Frameworks: Spring Boot, React, Node.js, Git/GitHub, Postman, Docker (learning), Relativity (Data Ops)

Core CS: Data Structures & Algorithms, DBMS, Operating Systems | 236+ problems solved on LeetCode

PROFESSIONAL EXPERIENCE

Associate Engineer - Consilio LLC, Bengaluru

Jul 2025 - Sep 2026

- Designed and configured case-specific Relativity workspaces and data-ingestion workflows for enterprise e-discovery engagements, enabling reliable setup across multiple concurrent client cases.
- Built and operated large-scale data-processing pipelines covering migration, filtering, de-duplication, OCR, validation, and document indexing to prepare litigation datasets for review.
- Diagnosed and resolved data-integrity issues across 2,500+ production support tickets using SQL-driven root-cause analysis, consistently meeting SLA commitments for client deliverables.
- Delivered production-ready native, image, and PDF document exports in compliance with client-specific workflows, coordinating cross-functionally to close issues within SLA.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern - WebStack Academy

Jul 2024 - Sep 2024

- Developed a full-stack food-ordering application using the MERN stack (MongoDB, Express, React, Node.js), following structured SDLC practices from design through deployment.
- Implemented end-to-end order management, menu management, and a responsive UI, translating functional requirements into working features independently.

PROJECTS

SecurelyGo - Java, Spring Boot, PostgreSQL, React

In Progress

- Designing and building a real-time security-personnel booking and dispatch platform: Spring Boot REST backend, PostgreSQL/PostGIS for geolocation-based matching, WebSocket-driven live dispatch updates, and JWT authentication.

Quick-Commerce - Django

github.com/sumeetpatil01/Quick-Commerce

- Designed and built a backend-focused e-commerce platform with relational data models spanning products, customers, and orders, supporting order management end to end.

Sentiment Analysis of Restaurant Reviews - Python, Scikit-learn, Pandas, NumPy, Flask

github.com/sumeetpatil01/Sentimentanalysis

- Built an ML pipeline classifying 10,000+ restaurant reviews as positive/negative, benchmarking SVM against Naive Bayes and serving the model via a Flask API to reach 85-90% accuracy on held-out test data.

CollabWrite - Go, WebSockets, SQLite

github.com/sumeetpatil01/CollabWrite

- Built a real-time collaborative text editor in Go with WebSocket-based concurrency for multi-user editing and live typing indicators, using SQLite for document persistence.

EDUCATION

Bachelor's Degree in Computer Science - Dayananda Sagar College, Bengaluru

2021 - 2025

CGPA: 8.60 / 10.0

CERTIFICATIONS & ACHIEVEMENTS

- Python 101 for Data Science
- Machine Learning with Python
- 1st Place, Final Year Project - "Cervical Cancer Detection Using Deep Learning"
- 1st Place, "Innovative Solutions in Technology" - competitive idea presentation
