SUMMARY

Software Engineer with production experience building and maintaining data-processing systems, plus full-stack development experience from internships and self-driven projects (Java/Spring Boot, MERN, Django, Flask). Strong foundation in DSA and databases, with a track record of resolving production issues at scale using SQL. Seeking a Software Engineer I role to build and scale backend systems.

SKILLS

Languages: Java, Python, SQL, JavaScript

Databases: MySQL, MongoDB, PostgreSQL

Tools & Frameworks: Spring Boot, React, Node.js, Git/GitHub, Postman, Docker (learning), Relativity (Data Ops)

Core CS: Data Structures & Algorithms, DBMS, Operating Systems | 236+ problems solved on LeetCode

PROFESSIONAL EXPERIENCE

Associate Engineer - Consilio LLC, Bengaluru

Jul 2025 - Sep 2026

- Configured and maintained Relativity workspaces for enterprise e-discovery projects by designing case-specific data structures and ingestion workflows.
- Executed large-scale data processing pipelines involving migration, filtering, de-duplication, OCR, validation, and document indexing.
- Used SQL to investigate and resolve data integrity issues across 2,500+ production support tickets, ensuring reliable client deliverables.
- Generated production-ready native, image, and PDF document exports while adhering to client-specific workflows and compliance standards, collaborating cross-functionally to resolve issues within SLA timelines.

INTERNSHIP EXPERIENCE

Full Stack Developer Intern - WebStack Academy

Jul 2024 - Sep 2024

- Built a full-stack food ordering application using the MERN stack (MongoDB, Express, React, Node.js), following SDLC-based project practices.
- Implemented responsive UI, order management, and menu management features end to end.

PROJECTS

SecurelyGo - Java, Spring Boot, PostgreSQL, React (In Progress)

- Building a security-personnel booking platform with real-time dispatch: Spring Boot backend, PostgreSQL/PostGIS for geolocation matching, React frontend, WebSocket-based live updates, and JWT authentication.

Quick-Commerce - Django | github.com/sumeetpatil01/Quick-Commerce

- Built a backend-focused e-commerce platform in Django with relational data models to manage products, customers, and orders end to end.

Sentiment Analysis of Restaurant Reviews - Python, Scikit-learn, Pandas, NumPy, Flask | github.com/sumeetpatil01/Sentiment-analysis

- Built an ML pipeline to classify 10,000+ restaurant reviews as positive/negative; compared SVM and Naive Bayes classifiers served via a Flask backend, achieving 85-90% accuracy on the held-out test set.

CollabWrite - Go, WebSockets, SQLite | github.com/sumeetpatil01/CollabWrite

- Built a real-time collaborative text editor in Go using WebSockets for concurrent multi-user editing and live typing indicators, with SQLite for document persistence.

EDUCATION

Bachelor's Degree in Computer Science - Dayananda Sagar College, Bengaluru

2021 - 2025 | CGPA: 8.60 / 10.0

CERTIFICATIONS & ACHIEVEMENTS

- Python 101 for Data Science
- Machine Learning with Python
- 1st Place, Final Year Project - "Cervical Cancer Detection Using Deep Learning"
- 1st Place, "Innovative Solutions in Technology" - competitive idea presentation

PUBLICATIONS

- Co-author, "Cervical Cancer Detection Using Deep Learning" - IRJMETS, Vol. 07, Jan 2025 (CNN-based Pap smear/colposcopy classification). DOI: 10.56726/IRJMETS66217
